

DATASHEET

GripFactory SaniGrip

GripFactory SaniGrip is a transparent two-component polyurethane water-based coating. As a result, this anti-slip product adheres perfectly to all types of shower trays and bathtubs, tile floors and all types of acrylic, polyester and sheet steel. GripFactory SaniGrip comes in a handy package that contains everything for a correct and fast application. We also supply custom solutions for professional use. The coating can be removed with a remover without affecting the surface.

GripFactory SaniGrip is available in a ready-made consumer packaging and a professional packaging for large-scale users. There is also the possibility to get GripFactory SaniGrip in a private label package. Please contact one of our anti-slip advisers for this.

Hygienic anti-slip solution

Unlike many other anti-slip solutions (such as an anti-slip bath mat), GripFactory SaniGrip is a durable and hygienic anti-slip solution. Due to its unique properties dirt, grease, dirt and bacteria do not get a chance to adhere to the surface.

Easy to clean

For optimal and long-term operation, we recommend to periodically clean this coating with a soap-free degreaser (such as the GripFactory SaniGrip Cleaner) and launderer.

Easy to remove

GripFactory SaniGrip can easily be removed with a special remover (for example the GripFactory SaniGrip Remover) without affecting the surface. This will restore your tile floor, bath tub or shower tray to its original state.

Characteristics

- Excellent anti-slip quality
- Scratch resistant and durable
- Surface is not affected
- Maximum adhesion (class 0, ISO2409)
- Easy to remove
- Dirt and water repellent
- Hygienic anti-slip solution
- Easy to clean
